Sub: Bulk Bid File Upload Functionality and utilization of Price / Yield range setting in e-Kuber

A reference is invited to [RBI Circular IDMD.No. S2800/08.02.032/2022-23 dated January 11, 2023](#), advising market participants to utilise the “Price / Yield Range Setting” facility available on the e-Kuber system prior to placing bids in primary market auctions.

RBI has now introduced and operationalized a new functionality for Bulk Bid upload on the e-Kuber portal. The new feature enables submission of bids for Central Government dated securities (G-Sec), Treasury Bills (T-Bills), and State Government Securities (SGS) through a standardized file upload template in the e-Kuber portal. It allows market participants to enter multiple bids during the auction time and is expected to reduce the time taken for submission of bids during auctions.

Members and stakeholders are requested to note the new Bulk Bid Upload facility and actively use the same to ensure optimal participation in Government Securities Auctions.

The [User Manual](#) and [Configuration manual](#) are attached

Members are also requested to share with RBI directly issues / suggestions with respect to the new functionality. Members also requested to share the same with FIMMDA.
